PROFESSIONAL SUMMARY

Full Stack Developer with 3.6+ years of experience designing and delivering scalable, high-performance web applications using React.js, Node.js, Express.js, MongoDB, MySQL, and AWS. Specialized in microservices architecture, RESTful API design, frontend performance optimization, and secure authentication systems (JWT, RBAC). Experienced in architecting end-to-end solutions handling 10K+ daily users with a focus on scalability, maintainability, and cloud-native deployment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Context API, React Hooks, REST API Integration, Performance Optimization, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, Microservices Architecture, JWT, RBAC, WebSocket
Databases: MongoDB, MySQL
Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Linux
Tools: Git, GitHub, Jira, Postman
Methodologies: Agile, Scrum, SDLC, MVC

PROFESSIONAL EXPERIENCE

Software Engineer – Full Stack Developer
Dynamisch IT Ltd, Pune
Aug 2022 – Jan 2026

Healthcare CTMS Web Application Platform

- Designed, developed, and optimized 35+ RESTful APIs serving 10K+ daily requests with high availability and performance tuning strategies.
- Migrated legacy React code to modern functional components with Hooks, improving maintainability by 45%.
- Optimized MongoDB and MySQL queries, reducing database response time by 35%.
- Directed and enforced secure authentication and authorization mechanisms using JWT and RBAC across distributed services.
- Re-architected monolithic modules into scalable microservices architecture, improving API performance by 40% and enabling independent service deployment.
- Managed end-to-end cloud deployment on AWS (EC2, S3, IAM) with production-grade configuration and environment management..
- Engineered document management system with audit logs and role-based access permissions.
- Formulated background job services for emails & notifications, reducing manual operations by 50%.
- Ensured HIPAA-aligned compliance and secure handling of protected health information.

- Orchestrated scalable and component-driven frontend architecture using React Hooks and reusable design patterns, improving maintainability by 45% and reducing UI defects by 30%.
- Developed data-intensive dashboards and complex multi-step workflows with optimized rendering strategies, improving user interaction efficiency by 30%.
- Implemented structured state management using Redux and Context API, ensuring predictable state flow across large-scale frontend modules.
- Engineered robust API integration layers with centralized error handling, loading states, and retry mechanisms for resilient user experience.
- Optimized frontend performance using memoization (React.memo, useMemo), lazy loading, code-splitting, and bundle optimization techniques, reducing initial load time by 35%.
- Delivered responsive, pixel-perfect UI aligned with modern UX standards using HTML5, CSS3, and modular styling architecture.
- Collaborated with cross-functional teams including QA, DevOps, and Product stakeholders to ensure seamless production releases.

AI Virtual Assistant (Internal Product)

- Built voice-enabled AI assistant using **Node.js** backend for automation and reminders.
- Integrated speech-to-text and intent processing services.
- Designed **REST APIs** and managed cloud deployment.

EDUCATION

MCA – Savitribai Phule Pune University – A+ (2023) | BCA – North Maharashtra University – A+ (2021)

ACHIEVEMENTS

- Delivered enterprise healthcare platform under aggressive deadlines.
- Recognized for high-impact contributions and performance optimization.
- Added AI features to production applications.
